

Shake well before use

## DESCRIPTION

**Ergro® Kel Calcium** is a new product from a line of micro nutrients chelated with EDTA and Fulvic Acids.

This chelated product maintains the elements in a soluble form which is not ionized, resulting in maximum assimilation by the plants.

**Ergro® Kel Calcium** can be applied via foliar spray and /or to the soil.

## MAIN BENEFITS OF USING Ergro® Kel Calcium

- Correcting Nutrient Deficiency
- Chelating and Transport of Elements.

## IMPORTANT

In order to immediately confirm the benefits of **Ergro® Kel Calcium** follow your regular crop practices without **Ergro® Kel Calcium** on a small area of your field and leave it as a check plot.

In another side of your field follow your regular crop practices and add **Ergro® Kel Calcium**. After 10-20 days compare your crops. You will be able to see the difference in your crop.

## CAUTION

**Ergro® Kel Calcium** is non toxic when used as directed.

If mixed with pesticides, please follow the label directions of those products.

Do not store with food products. Do not reuse the container, destroy it. Do not leave within the reach of children.

## GUARANTEE

**Ergro® Kel Calcium** components are guaranteed. However, as we do not have any control in its use we take no responsibility for the results obtained.

## RECOMMENDATIONS AND DOSAGE

### Soil Application

In vegetables and annual crops, the dosage will vary from 1 to 1.5 quarts per acre, depending on the crop and the needs of the element to apply. It is recommended that **Ergro® Kel Calcium** should be 2 inches below the seed. In direct planting, **Ergro® Kel Calcium** must be 2 inches from the planting line. The number of applications will depend on the deficiency of the element. In fruit trees and forest trees, it is recommended to apply 2 to 4 fl oz of **Ergro® Kel Calcium** per tree. Trees of larger size will need larger dosages.

The application must be done in the second third of the dripping zone at a 6 to 8 inch depth.

### Foliar Application

In vegetables and annual crops, the dosage will vary from 8 ounces to 16 ounces per acre. Higher dosages are recommended in plants with more foliage, or when the element deficiencies are very high. In fruit trees and forest trees, it is recommended to apply from 0.5 to 1 fl oz of **Ergro® Kel Calcium** per gallon of water. It is recommended to apply the first application before flowering, and the second application when the fruits are the size of a "marble". It is also recommended to apply a third application after harvest to increase the reserves of the fruit trees or forest trees.

## GUARANTEED ANALYSIS

Calcium (Ca).....	10.00%
Total Magnesium (Mg).....	1.00%
1.00% Water Soluble Magnesium (Mg)	
Boron (B).....	0.58%
Molybdenum (Mo).....	0.002%

**Derived from:** Calcium Chloride, Magnesium Sulfate, Sodium Tetraborate, Sodium Molybdate./F002156

### Non-Plant Food Ingredients:

Fulvic Acid .....0.60%

**Derived from:** Vegetable Matter.

**Fulvic Acids** may enhance soil micronutrients availability within the soil, and may enhance nutrient uptake.

**Caution:** The application of fertilizers containing molybdenum may result in a forage crops containing levels of molybdenum which are toxic to ruminant animals.

## FOR ALL CROPS

Net Content: 1 Quart (32 fl oz, .945 lt)
