Ergro® Win 10-40-3

Promotes Increase in Quantity and Quality During Flowering and Fruit Stage

Ergro Win is a foliar fertilizer enriched with fulvic acids, formulated for application to diverse plants and crops. With a nutrient-rich composition, including Nitrogen, Phosphorus, and Potassium, alongside essential micronutrients, it ensures comprehensive and excellent nutrition. The higher phosphate concentration fosters impressive flowering and fructification, complemented by the Nitrogen component that encourages robust crop growth.

Ergro Win promotes harmonious plant development, resulting in a significant increase in yields.

Mode of Action

- Penetrates stomas of foliage and stems, providing the necessary nitrogen and phosphorous at flowering and fructification, readying the crop for maturity
- Includes fulvic acids which help transport nutrients throughout the plant

Benefits

- Promotes quantity and increases quality of flowers and fruits
- Helps prevent flower loss and ensures flower holding
- Increases cellular permeability
- Balance of macro and micronutrients increases plant quality and overall yield
- Maintains root development
- Promotes early fruit formation ensuring future production
- Excellent aerial plant development for more vigorous plants
- Humic and fulvic acids enhance soil micronutrient availability within the soil and nutrient uptake
- 100% water soluble
